For literature package 559-233-8267

Loads of space for bikes and support equipment. The walls and floor have a tough coating -- just hose it out. A high-end sound system was also installed.

The living area was designed for function and comfort. Sleep up to four. A refrigerator, 12 & 110V system, fresh water supply are some of the standard equipment items included. Plus an optional 2000W inverter and Porta Potti. Many other options are available. The above plan is similar to Brian's.

The Lopes 55 Special

"I've owned many different types of vehicles, always in search for that perfect one — that does it all. With the help of Sportsmobile, the search is over. This is hands-down the ultimate vehicle for everything from one-day trips to week-long adventures. A separate garage to hide all your toys, two separate sleeping areas, enough room to stand up in and a van that is easier to drive and park than any full-size pick-up truck. All this plus over 20 miles per gallon. THIS IS THE ONE!!! The LOPES 55 model Sprinter."

The van is a Dodge Sprinter powered by a Mercedes-Benz diesel with a high torque transmission. The Sprinter handles well with a tight turning radius. Plus it's economical to operate and fuel efficient — 22+ mpg. Ford 2 and 4-wheel drives and Chevy vans also available. Gas and diesel.
